DETAILED ACTION

Prior/Current Litigation Status

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 5,655,961 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

Consent of Assignee

This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

The application contains an offer to surrender signed by a person authorized to act on behalf of the assignee, and includes a certificate under 37 CFR 3.73(b) including copies of assignments or other documents in the chain of title are attached. However, current office records indicate 5,655,961, upon which this reissue application is based, has subsequently been reassigned.

Art Unit: 3714

Furthermore, these documents appear to relate to the offer of surrender, which is separate from the consent of assignee to take action in the application. It is noted that applicant's original transmittal letter indicated that both an offer to surrender and a consent of assignee had been filed. As set forth above, however, the consent does not presently appear in the file. Re-presentation of the prior copy would only be appropriate if the office records as to current assignee are incorrect. Accordingly, a proper assent of the current assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

Surrender of Patent

Regarding the offer to surrender, the original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Reissue Applications

The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following: The error defined in the declaration has no meaning with respect to the instant claims or the changes made therein. More specifically, the declaration defines the error in relation to "independent claims 1, 21, 28 and ... claim 55". The patent upon which this application is based contains independent claims 1, 8 and 9.

Further, the limitations discussed in the statement of the error are not seen in

the patent claims or in the newly presented reissue claims which allegedly correct the error. In sum, the statement of the error is nonsensical and cannot support a reissue application.

Claims 1-23 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

In accordance with 37 CFR 1.175(b)(1), a supplemental reissue oath/declaration under 37 CFR 1.175(b)(1) must be received before this reissue application can be allowed.

Receipt of an appropriate supplemental oath/declaration under 37 CFR 1.175(b)(1) will overcome this rejection under 35 U.S.C. 251. An example of acceptable language to be used in the supplemental oath/declaration is as follows:

"Every error in the patent which was corrected in the present reissue application, and is not covered by a prior oath/declaration submitted in this application, arose without any deceptive intention on the part of the applicant."
